GCSE **CHEMISTRY**

Foundation Tier Paper 2

Wednesday 12 June 2019

Morning

Materials

For this paper you must have:

- a ruler
- a scientific calculator
- the periodic table (enclosed).

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

Information

- The maximum mark for this paper is 100.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

Time allowed: 1 hour 45 minutes

| | Answer all questions in the spaces provided | I. |
|-------|---|-----------------|
| 0 1 | This question is about drinking water. | |
| | There are two main steps in producing drinking water from | n fresh water. |
| 0 1.1 | Draw one line from each step to the reason for the step. | [2 marks] |
| | Step | Reason for step |
| | | Desalination |
| | Filtration | Improve taste |
| | | Increase pH |
| | Sterilisation | Kill bacteria |
| | | Remove solids |
| 0 1.2 | Which two substances are used to sterilise fresh water? | [2 marks] |
| | Tick (✓) two boxes. | |
| | Ammonia | |
| | Chlorine | |
| | Hydrogen | |
| | Nitrogen | |
| | Ozone | |
| | | |

Turn over ►

| | A large amount of aluminium sulfate was accidentally added to the drinking wate supply at a water treatment works. | Do not wu outside t box | |
|------|--|-------------------------------|--|
| 01.3 | Scientists tested a sample of the drinking water to show that it contained dissolv solids. | 'ed | |
| | Which two methods show the presence of dissolved solids in the sample of drin water? | | |
| | [2] Tick (✓) two boxes. | narks] | |
| | Add damp litmus paper to the sample. | | |
| | Evaporate all water from the sample. | | |
| | Measure the sample's boiling point. | | |
| | Test the sample with a glowing splint. | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |

| | | | Do not write |
|-------|---|--|--------------|
| 0 1.4 | Scientists tested two water samples from the drinking water supply. | | |
| | The scientists tested one sample for alui ions. | minium ions and the other sample for sulfate | |
| | Draw one line from each ion to the comp | bound needed to identify the ion. [2 marks] | |
| | lon | Compound needed to identify ion | |
| | | Barium chloride | |
| | Aluminium ion | Copper sulfate | |
| | | Silver nitrate | |
| | Sulfate ion | Sodium hydroxide | |
| | | Sulfuric acid | |
| 0 1.5 | How could pure water be produced from solids? | drinking water that contained dissolved [1 mark] | |
| | Tick (✓) one box. | | |
| | Chromatography | | |
| | Cracking | | |
| | Distillation | | |
| | Sedimentation | | 9 |
| | | | |

| 0 2 | Some central heating boilers use methane as a fuel. | Do r outs |
|---------|--|--------------|
| | Carbon monoxide detectors are placed near central heating boilers. | |
| 02.1 | Which three properties of carbon monoxide make it necessary to use carbon monoxide detectors? | |
| | Choose answers from the box. [3 marks] | |
| | acidic alkaline colourless corrosive | |
| | insoluble odourless toxic | |
| | 1 | |
| | 2 | |
| | 3 | |
| 02.2 | Complete the sentence. | |
| | [1 mark] Methane produces carbon monoxide when burning in a limited supply of | |
| | · | |
| | 2 | |
| 0 2 . 3 | 8 g of methane has a volume of 12 dm ³ at room temperature and pressure. | |
| | Calculate the mass of 36 dm ³ of methane. [2 marks] | |
| | | |
| | | |
| | | |
| | Mass = g | |
| | | |
| | | |

0 2 . 4 Most methane is obtained from natural gas, which is a fossil fuel.

Methane can also be produced renewably.

Which two are renewable sources of methane?

Tick (✓) **two** boxes.

Animal waste

Food in landfill

Nitrogen in the air

Non-biodegradable plastics

Scrap iron
