Please check the examination details	below before entering your candidate information
Candidate surname	Other names
Pearson Edexcel Level 1/Level 2 GCSE (9–1)	Centre Number Candidate Number
Tuesday 21 Ma	ay 2019
Morning (Time: 1 hour 30 minutes)	Paper Reference 1MA1/1H
Mathematics Paper 1 (Non-Calculator Higher Tier)
You must have: Ruler graduated in protractor, pair of compasses, pen, Tracing paper may be used.	

Instructions

- Use **black** ink or ball-point pen.
- Fill in the boxes at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided there may be more space than you need.
- You must **show all your working**.
- Diagrams are **NOT** accurately drawn, unless otherwise indicated.
- Calculators may not be used.

Information

- The total mark for this paper is 80
- The marks for each question are shown in brackets
 use this as a guide as to how much time to spend on each question.

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

DO NOT WRITE IN THIS AREA

Answer ALL questions.

Write your answers in the spaces provided.

You must write down all the stages in your working.

1 There are only blue cubes, red cubes and yellow cubes in a box.

The table shows the probability of taking at random a blue cube from the box.

Colour	blue	red	yellow
Probability	0.2		

The number of red cubes in the box is the same as the number of yellow cubes in the box.

(a) Complete the table.

There are 12 blue cubes in the box.

(b) Work out the total number of cubes in the box.

(2)

(Total for Question 1 is 4 marks)

2 Deon needs 50 g of sugar to make 15 biscuits.

She also needs

three times as much flour as sugar two times as much butter as sugar

Deon is going to make 60 biscuits.

(a) Work out the amount of flour she needs.

Deon has to buy all the butter she needs to make 60 biscuits. She buys the butter in $250 \,\text{g}$ packs.

(b) How many packs of butter does Deon need to buy?

(2)

..... g

6 A shop sells packs of black pens, packs of red pens and packs of green pens.

There are

2 pens in each pack of black pens5 pens in each pack of red pens6 pens in each pack of green pens

On Monday,

number of packs	number of packs	number of packs $7:3:4$
of black pens sold .	of red pens sold	of green pens sold $-7:3:4$

A total of 212 pens were sold.

Work out the number of green pens sold.

10 The graphs with equations $3y + 2x = \frac{1}{2}$ and $2y - 3x = -\frac{113}{12}$ have been drawn on the grid below.

Using the graphs, find estimates of the solutions of the simultaneous equations

$$3y + 2x = \frac{1}{2}$$
$$2y - 3x = -\frac{113}{12}$$

x =

y =

ch B.	

Richard says that the people on coach A vary more in age than the people on coach B.

(c) Is Richard correct? You must give a reason for your answer. (1) (Total for Question 11 is 4 marks) 12 Here are three spheres.

Q

The volume of sphere \mathbf{Q} is 50% more than the volume of sphere \mathbf{P} . The volume of sphere **R** is 50% more than the volume of sphere **Q**.

Find the volume of sphere \mathbf{P} as a fraction of the volume of sphere \mathbf{R} .

13 Given that *n* can be any integer such that n > 1, prove that $n^2 - n$ is never an odd number. (Total for Question 13 is 2 marks) 14 Find the exact value of $\tan 30^\circ \times \sin 60^\circ$ Give your answer in its simplest form. (Total for Question 14 is 2 marks)

15 The diagram shows a solid shape. The shape is a cone on top of a hemisphere.

The height of the cone is 10 cm. The base of the cone has a diameter of 6 cm. The hemisphere has a diameter of 6 cm.

The total volume of the shape is $k\pi$ cm³, where k is an integer.

Work out the value of *k*.

21 The functions f and g are such that

$$f(x) = 3x - 1$$
 and $g(x) = x^2 + 4$

(a) Find $f^{-1}(x)$

 $f^{-1}(x) =(2)$

Given that fg(x) = 2gf(x),

(b) show that $15x^2 - 12x - 1 = 0$

(5)

(Total for Question 21 is 7 marks)

22 There are only r red counters and g green counters in a bag.

A counter is taken at random from the bag.

The probability that the counter is green is $\frac{3}{7}$

The counter is put back in the bag.

2 more red counters and 3 more green counters are put in the bag.

A counter is taken at random from the bag.

The probability that the counter is green is $\frac{6}{13}$

Find the number of red counters and the number of green counters that were in the bag originally.

red counters.....

green counters.....
