

Mark Scheme (Results)

Summer 2013

GCSE Physics (5PH1F) Paper 01

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk for our BTEC qualifications.

Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

If you have any subject specific questions about this specification that require the help of a subject specialist, you can speak directly to the subject team at Pearson. Their contact details can be found on this link: www.edexcel.com/teachingservices.

You can also use our online Ask the Expert service at www.edexcel.com/ask. You will need an Edexcel username and password to access this service.

Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- For questions worth more than one mark, the answer column shows how partial credit can be allocated. This has been done by the inclusion of part marks eq (1).
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Quality of Written Communication

Questions which involve the writing of continuous prose will expect candidates to:

- Write legibly, with accurate spelling, grammar and punctuation in order to make the meaning clear
- Select and use a form and style of writing appropriate to purpose and to complex subject matter
- Organise information clearly and coherently, using specialist vocabulary when appropriate.

Question	Answer	Acceptable answers	Mark
Number			
1(a)(i)	☑ B seven		(1)

Question	Answer	Acceptable answers	Mark
Number			
1(a)(ii)	□ C red, orange, yellow		(1)

Question Number	Answer		Acceptable answers	Mark
1(b)	detecting ultraviolet → forged ba notes			(2)
	gamma rays cooking microwaves detection cancer			
	three correct	(2)		
	one or two correct	(1)		

Question Number	Answer	Acceptable answers	Mark
1(c)(i)	a suggestion from any two of the following: (areas of the hand) show • Patches / (shaded) areas / brightness / colour(s) (1) • Indication of temperature / heat (1)	blood flow / veins / arteries / named part of hand thermal / hot / cold / warm / cool / hotter / colder / warmer / cooler any colour identified as hot or cold / any part of the hand identified as hot or cold (2) Ignore germs / bacteria / nerves	(2)

Question Number	Answer	Acceptable answers	Mark
1(c)(ii)	an explanation linking two of the following:		(2)
	X-rays {mutate / damage / harm / ionise} cells or DNA (1)	{kills/destroys} cells / causes cancer / tumours / ionising	
	the {energy / frequency / wavelength / penetration} is different (1)	Penetrates the skin / body	
	Correctly identified difference (1)		
		x-rays have {more energy / high(er) frequency / {short(er) / low(er)} wavelength / great(er) penetration} (2)	
		RA for infrared	
		Ignore power	

Question	Answer	Acceptable answers	Mark
Number			
2(a)(i)	⋈ A ultrasound waves have a		(1)
	frequency above 20 000 Hz		

Question	Answer	Acceptable answers	Mark
Number			
2(a)(ii)			(1)

Question Number	Answer	Acceptable answers	Mark
2(a)(iii)	a description including any two of the following:		(2)
	 (ultrasound waves / pulses) go down (through the water) (1) 	on diagram, wave or ray indicated as downwards idea of wave moving towards or hitting fish	
	 (ultrasound waves are) reflected off fish (1) 	on diagram, waves or rays reflected off fish idea of wave bouncing off fish	
	 (reflected ultrasound waves) are received by boat (1) 	signal is timed	
	 time delay (shows how deep fish are) (1) 	ignore fish emitting ultrasound	

Question Number	Answer		Acceptable answers	Mark
number				
2(b)(i)	(number of waves =) 5	(1)		(1)

Question Number	Answer	Acceptable answers	Mark
2(b)(ii)	Either 60 ÷ 5 (1) or 60 ÷ (their answer to 2(b)(i)) (1)	12 (cm) or ecf from number of waves	(1)

Question Number	Answer	Acceptable answers	Mark
2(c)	Substitution 1.7 x 8 (1)		(2)
	Evaluation 14 (cm/s) (1)	13.6 (cm/s)	
		give full marks for correct answer, no working	
		Power of 10 error max. 1 mark.	

Question	Answer	Acceptable answers	Mark
Number			
3(a)(i)	⊠ C on a screen		(1)

Question Number	Answer	Acceptable answers	Mark
3(a)(ii)	Explanation linking the following: - (measure) distance / length / from / line (1)	how far away use ruler / tape measure measure u(object distance) and v(image distance)	(2)
	lens to image / screen / focal point (1)	calculate focal length using 1/u + 1/v = 1/f (measure) from lens to image (2)	

Question Number	Answer	Acceptable answers	Mark
3(b)(i)	A description including the following: • magnifies	brings nearer / zooms in / looks closer / makes bigger / enlarges	(2)
	the imagerefracts the light	intermediate / real image	

Question	Answer	Acceptable answers	Mark
Number			
3(b)(ii)	☑ B energy		(1)

Question	Answer	Acceptable answers	Mark
Number			
3(c)(i)	Substitution		(2)
	v = 1920/6.0		
	(1)		
	Evaluation	300 (m/s)	
	(1)	give full marks for correct	
	320 (m/s)	answer, no working (2)	
		Power of 10 error max. 1 mark.	

Question Number	Answer	Acceptable answers	Mark
3(c)(ii)	Suggestions including the following: • recognition of any difference in speed / velocity (1) • correct difference in speed (1)	e.g. sound travels faster / quicker than light (1) c>v / v <c c="">320 (m/s) Light travels (much) faster (2) RA Ignore 'sound takes longer' or other references to time.</c>	(2)

Question	Answer	Acceptable answers	Mark
Number			
4(a)			(2)
	light → electrical → chemical	These answers must be in the	
	energy energy	correct order	
	energy		
	(1)		

Question Number	Answer	Acceptable answers	Mark
4(b)(i)	350 (J)	400 – 50 (J)	(1)

Question Number	Answer		Acceptable answers	Mark
4(b)(ii)	Substitution			(2)
	50 ÷ 400	(1)		
	or			
	<u>50 x 100</u> (%)			
	400			
	 Evaluation			
	13(%)	(1)	12.5(%), 0.125, 0.13 or 1/8	
			Give full marks for correct answer, no working	

Question Number	Answer	Acceptable answers	Mark
4(c)(i)	An explanation linking the following points:		(2)
	black ((1)	
	(because)		
	(good) absorber (of thermal radiation) (1)	{absorbs / takes in} heat radiation	
		ignore references to: attract good emitter light dark / darker	

Question Number	Answer	Acceptable answers	Mark
4(c)(ii)	 an explanation linking any three of the following points: (bag / water) absorbs { thermal energy / heat / radiation} (bag / water) { radiates / emits} { thermal energy / heat / radiation} more heat radiated at higher temperature (1) input and output are balanced (at steady temperature) (1) 	idea of energy input e.g. "sun heats the bag up" idea of energy output idea of more heat lost (to surroundings)at higher temperature	(3)
		"absorbing heat at same rate as radiating heat" (3) ignore (sun) light / rays	

Question	Answer	Acceptable answers	Mark
Number			
5(a)	☑ B charge		(1)

Question Number	Answer		Acceptable answers	Mark
5(b)	Substitution 12 x 230 evaluation 2800 (W)	(1) (1)	2760 (W) give full marks for correct answer, no working Power of 10 error max. 1 mark.	(2)

Question Number	Answer		Acceptable answers	Mark
5(c)	Conversion 0.4 (kW)	(1)		(3)
	Substitution 0.4 x 10 x 15 (p) or 0.4 x 10 x 0.15 (£)	(1)		
	Evaluation $60(p)$ or $£0.6$	(1)		
			give marks for correct answer, no working $60(p)$ or $\underline{f}0.6$ (3) $60,000(p)$ or $\underline{f}600$ (2) 6 to any other power of 10 (1)	
			(400/40/4) x 10 x (15/0.15) gains one mark if no mark can be awarded for evaluation.	

Questior Number	1	Indicative Content		Mark
QWC	*5(d)	Energy saving lamp Advantages Saves energy / uses energy more efficiently Cost efficient Lasts longer Lower power (needed) Efficiency 20% Lasts 9000 hours longer Lasts 10 times longer Produces 4 times as much light energy for every 100J of electrical energy supplied. More readily available Disadvantages Higher initial cost May contain harmful gases Takes longer to reach maximum brightness Not such a bright light Costs 5 times as much Costs £1.20 more	Filament lamp Disadvantages Wastes more energy Less efficient Shorter lifetime Higher power (needed) More fossil fuels burnt Gets very hot Only 5% efficient Wastes 95% of energy supplied Uses 4 times as much power Less readily available Advantages Costs less to buy Do not contain harmful gases Lights immediately Bright light	(6)
		Table of information gi Energy saving lamp power =15 W Cost = £1.50 Lifetime = 10 000 hours Produces 20J of light energy for every 100J of electrical energy supplied	Filament lamp power =60W Cost = £0.30 Lifetime = 1000 hours	

Level	0	No rewardable content
1	1 - 2	A limited description of one advantage or one disadvantage e.g. energy saving lamps last a long time/ filament lamps get very hot OR A correct value quoted from information with no comparison.
		 The answer communicates ideas using simple language and uses limited scientific terminology Spelling, punctuation and grammar are used with limited accuracy
2	3 - 4	A simple description of two different advantages / disadvantages e.g. energy saving lamps cost more but last longer / filament lamps have a short life time and use more power OR Correct values quoted from table and used to provide two comparisons without calculations
		 The answer communicates ideas showing some evidence of clarity and organisation and uses scientific terminology appropriately Spelling, punctuation and grammar are used with some accuracy
3	5 - 6	A detailed description of two different advantages / disadvantages using a quantitative comparison. e.g. energy saving lamps cost 5 times more but last 10 times longer. / Energy saving lamps produce 4 times as much light energy for every 100J of electrical energy supplied and are much more efficient. / Energy saving lamps last 9,000 hours longer than and they use less power.
		 The answer communicates ideas clearly and coherently uses a range of scientific terminology accurately Spelling, punctuation and grammar are used with few errors

Question	Answer	Acceptable answers	Mark
Number			
6(a)(i)	Milky Way	Accept any spelling	(1)

Question	Answer	Acceptable answers	Mark
Number			
6(a)(ii)	☑ D white dwarf		(1)

Question Number	Answer	Acceptable answers	Mark
6(b)(i)	Mercury 4 900 km Venus 12 100 km Mars 6 800 km Three correct (2) One or two correct (1) + or – one square Judge by eye		(2)

Question Number	Answer	Acceptable answers	Mark
6(b)(ii)	Correct information from table 1.52 (1)	Seen anywhere in the answer	(2)
	Conversion to kilometres (1.52) x 150 000 000 (1)	Incorrect information shown to be used correctly (1)	
		Correct answer, no working scores full marks 228 000 000 / 2.28 x 108 (km)	
		228 to any power of 10, allow 1 mark if no other mark awarded.	
		225 000 000 / 2.25 x 10 ⁸ (km), allow max 1 mark if no working shown.	

Question		Indicative Content	Mark
Number		A description including some of the following points	
QWC	*6(c)	In Solar System	(6)
Level	0	No rewardable content	
1	1 - 2	 A limited description giving a (named) way of searching for e.g. SETI OR using telescopes OR send messages to space of spacecraft The answer communicates ideas using simple language and limited scientific terminology Spelling, punctuation and grammar are used with limited accordinates. 	uses curacy
2	3 - 4	 A simple description of any TWO of the searches for evidence e.g space probes go to other planets and telescopes are used OR radio telescopes and looking for radio waves from space. The answer communicates ideas showing some evidence of clarity and organisation and uses scientific terminology appropriately Spelling, punctuation and grammar are used with some accuracy 	
3	5 - 6	 A detailed description of searches for evidence within AND outside the solar system e.g. Unmanned space probes go to other planets and radio telescopes search for radio signals from space. The answer communicates ideas clearly and coherently uses a range of scientific terminology accurately Spelling, punctuation and grammar are used with few errors
